Subject: Neuhauser Update: Crestone

Good morning,

I talked with the community relations manager, Bridget Ford, for Crestone Peak this morning, giving her the general overview of the pending drum removal. She will notify members of her organization that need to be aware of the site.

Bridget let me know that they should be done with fracking on the site in the next few weeks. They will then begin to remove the sound walls and the pads, starting with the northern pad. The removal of fracking infrastructure will likely create a good deal of truck traffic in the area. She also mentioned the Town of Erie has Crestone on a strict trucking route (avoiding neighborhoods) with time restrictions from 6:30 to 8:30 am and 2:30 to 4:30 pm. I let her know the property owner will be the one to coordinate truck patterns but that I would relay to him the importance of getting in touch with both Crestone and the Town of Erie regarding truck removal of the waste.

Thanks,
Kelly
